a Shared-prefix control
byte-identical within pair
User 1
Model 1
User 2
Model 2
pre-final read
casually rendered benchmark item
original final user message
final read
Real WildChat history. Sharp localization, but the ending can also shift topic and speech act.
b Matched-coherence control
byte-identical within pair
User 1
Model 1
User 2
Model 2
pre-final read
faithful casual benchmark question
genuine practical request, same topic
final read
Model-authored throughout. Endings matched on topic, register and length.
